

# Small Talk Table Collection

DESIGNED IN 2024

CARE NOTES | REV 00

## NOTE

Occasional rings from liquids may appear on the surface. Use felt or rubber feet pads on the bottom surfaces of all objects placed on the table to protect the polished surface.

## CLEAN

Wipe up spills quickly to avoid staining. When necessary, clean using mild household detergent and water. Do not use natural citrus based cleansers, cleaning products that contain acetone, denatured alcohol, heavy abrasive, bleach-based, or ammoniated cleansers as they can damage the polished surface.

## MAINTENANCE AND WEAR

Cover or store indoors during wet weather. Use a tenting device when covered (e.g. support pole, table riser). Bring indoors during freezing conditions.

Avoid leaving objects on the table for extended periods or during wet weather as marks could form. Prolonged exposure may cause penetration of the sealer and possible discoloration.
